Office Action Summary	Application No. 10/083,194	Applicant(s) MACKENZIE ET AL.	
	Examiner Mark H. Paschall	Art Unit 3742	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,36,37,41,43,44,52,52,75,76,83-93,99,103 rejected under 35

U.S.C. 102(b) as being clearly anticipated by lida et al 5,874,707.

Claims are unpatentable for the reasons set forth in the prior office action. Note torch leads 14,15, Figure 1, torch head 3, quick disconnect for connecting the head to the leads.

Response to Arguments

Applicant's arguments filed 08-01-2005 have been fully considered but they are not persuasive. Applicant's remarks advance that the lida et al patent does not teach a torch lead connected to a torch head via a quick disconnect means. As set forth above, clearly lida teaches a torch head 3 that is connected to leads 14,15 via disconnect means 1. Means 1 contain a socket for the lead pins 14,15. See column 11 discussion of figure 8. Applicants argue that lida does not show leads which carry both gas and current. Applicant should be aware that a torch lead can carry gas and/or current and need not carry the same. In addition, Applicant's attention is directed to column 13, lines 59 to column 14, lines2, which mention special springs in the lead connection so that the current carrying will not melt them. Clearly lida et al teach the claimed subject matter.

Allowable Subject Matter

Claims 3-35,38-40, 42,45-51,54-74,77-82,94-98,100-102,104-106 contain allowable subject matter for further defining the connection structure of the quick disconnects coupling system.

Conclusion

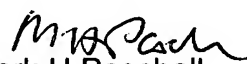

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
